The Metal-Tech Series

When you need a solution to address strip coating, strip processing, coil coating, metal decorating, electrogalvanizing, cold mill or tin mill applications, look no further than Finzer Roller's extensive **Metal-Tech Series** of rollers. Exclusively designed for the metals industry, our solutions feature the innovative *CoilMaster* line of proprietary compounds. These formulations represent the most superior quality compounds available in the marketplace.

Delivering Customized Solutions Today

Finzer Roller's team of experienced designers, engineers and craftsmen has been outfitting the specialty and standard metals industry for more than 75 years. We provide custom fits for specific and exacting applications, and offer hundreds of compounds from more than a dozen elastomer families. Our solutions are tried, tested and true. Before we put any solution into service, extensive static and dynamic fluid immersion tests are performed along with a series of physical tests to ensure strength, resilience and abrasion resistance.

When it comes to making new or refurbished rollers, no one can match our expertise or our commitment to quality products and customer service. Our experienced field sales engineers will evaluate your specific needs and engage

our technical staff to customize the solution that's best for you. We have earned a reputation for asking the questions most people never think of — we want to know how our solution fits into your overall business process.

Developing Innovative Technologies for Tomorrow

At Finzer Roller, we are working to revolutionize the roller industry. Our engineers are continually testing new technologies to help change the way you do business. One area of exploration is a new roller tracking system that, once designed, will provide critical, on-the-spot information to plant personnel so they can isolate areas of operational malfunction, assess contributing factors and determine the quickest and most cost-effective solution so you can get your machinery back up and running at maximum speed and output.

The Finzer Roller Difference

Ours is not a one-size-fits-all solution. When you receive a Finzer roller, you are assured each and every product is custom manufactured to meet your exact needs. We have one of the largest and most comprehensive selections of rubber compounds found anywhere in the industry. We continually innovate and invest in research and development and state-of-the-art manufacturing technology so that we produce the highest quality, most durable and long-lasting products in the market.

We get you back to work faster. Regardless of your location, our national presence enables us to fulfill orders quickly and on-time. All of our plants have the ability to repair and fabricate solutions on-site.

Customer service is at the heart of everything we do. Our customers have come to rely on us to provide them what they want — when they need it most. We work hard for our customers and they reward us with a customer retention rate of almost 99%.

Our Customers Say It Best.

Finzer Roller is your one-stop resource for all your roller needs. But don't take our word for it. Your Finzer Sales Professional will be glad to put you in touch with one of our customers who can share their Finzer Roller experience with you.
