

Products and Services for the Corrugated Industry

Wiper Rollers

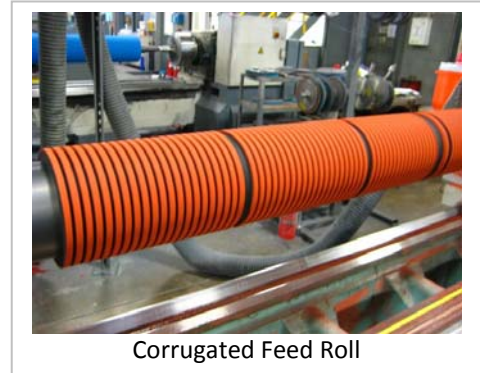

- Urethane rollers are available in a proven range of formulation custom designed to meet the demands of an Anilox coating
- Unaffected by inks, wash-up or ozone
- Non-glazing
- Consistent durometer for the life of the roller
- Less subject to mechanical damage than rubber rollers and 30 % more durable
- High purity material is free of foreign particles that can cause excessive wear to shorten the life of the Anilox roller
- Wipe rollers are also available with Durakote and X-Press covers
- Hardness & surface matched to anilox type rolls
- Stable hardness, non-glazing surface
- High abrasion surface

Feed Rollers

- Available in three types of urethane covers which deliver longer life and better printing (conventional, Perma-Feed 111 and Perma-Feed 4)
- High coefficient of friction with no glazing for the life of the roller
- Allows constant feed with a minimum amount of pressure
- Reconditioned to OEM specifications
- Dual or single layer construction
- High abrasion outer layer
- Patented grooving design

Waxer Rolls

- High temperature resistance
- Chemical resistance
- Easy to clean

Corrugated Feed Roll

When you need a roll cover, core repair, a new shell, or just someone to help you solve a problem with corrugated manufacturing, please give Finzer Roller a call and let us show you what we can do.
